To make a CursorXP theme:

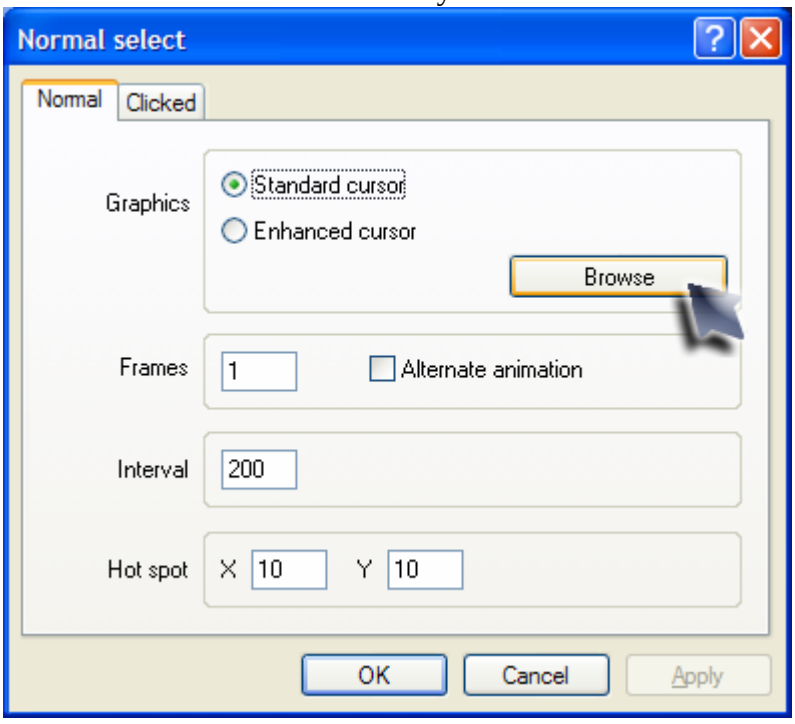

1) Open CursorXP, under the Scheme area select <New theme> from the drop down menu.

2) Click the configure button in the Scheme area
3) Select the cursor you would like to change and click the configure button at the bottom of the window

4) Select the tab you wish to configure a cursor for (Normal or Clicked) and select the Browse button to look for your cursor

5) Type in the number of animation frames in your cursor
If your cursor is 32x32 pixels and has 4 frames the image will be 32x128
6) Put in the animation interval desired and the hotspot location.

Repeat this process for all of the cursors you need in your set. Once all cursors are completed, click the "Save as…" button and give your theme a name. Click ok and enjoy your CursorXP Theme.
